

Recovery Procedure

Checkpoint

After the first durable checkpoint, keep the document lease active.
If the warning indicator remains visible at the bottom of this page,
continue with the next numbered page before changing any state.
This boundary sentence must remain associated with page one.

Resume

On page two, confirm that the lease owner and checkpoint still match.

Resume only the persisted phase and never repeat a completed side effect.

Record the final state after every expected artifact is present.

This boundary sentence must remain associated with page two.
